

Successful Crosses II

The preceding "Successful Crosses I" (page 152) ranks the year's 50 leading sires by progeny earnings and presents cumulative statistics about the starters that result when those stallions were bred to daughters of specific sires.

This is the reverse of that format. Following are the 50 leading broodmare sires of 2009 and statistics about the performing foals that result when their daughters were bred to specific sires. Compiled November 6, the statistics are for 2009 starters only, and the combined earnings of all offspring from a cross must exceed \$10,000 for the sire to be included on the list.
